Identity and Access Management for Business

Keep your customer data safe and protect your business from harm

Getting digital identity right provides a strong front door to your business

CEO
we must deliver value to our customers and **build loyalty and trust**

Compliance
we must meet our **legal obligations**

Risk
we need to mitigate **business risk**

IT
we must guard against **malicious access**

Security
customer data must be **secured against risk** of breach

Marketing
we need analytics on **customer experience**

If you **don't understand** how **customer data is protected**, it is not protected well enough

Do you understand your **legal obligations** for data protection?

Are you confident your customer data is **properly secured**?

What will you do **when** (not if) **a data breach** occurs?

condatis
a sitekit company

It starts with identity, and we are here to help

Build identity services that respect preference and choice

Assess

1

We assess Microsoft identity technologies in context

2

We will identify the problem to solve and requirements in scope

3

We will test identity capabilities to reassure business stakeholders

4

Your business assesses whether Condatis is a reliable delivery partner

Plan

5

We develop a strategy to achieve tactical quick-wins and plan long-term

6

We produce high-level design documentation to clearly set vision and scope

7

We plan for success and set a timeline for Live and business as usual

8

We estimate effort to work with your team to deliver on strategy, plan and timeline
